v1.6

CREATIVE GUIDELINES
& SPECIFICATIONS

Policies

FOR MORE IN-DEPTH SPECS, SEE PAGES 2 & 3

The following policies must be adhered to. Should any creative not meet any of these policies, they will be rejected and not serve across any inventory.

- All Ads Must be SSL-compliant and purely HTML5 (Both MP4 and WebM must be used in XML for VAST Ads).
- OBA mandatory for US, Canada and Europe (UK, France, Germany, Switzerland, Austria, Poland, Italy, Spain).
- Display ad must have a working backup ad image at all times.
- Landing page must be crawl-able, no redirects or bridge pages allowed. The AudienceScience pixel must be present on the brand's landing page.
- Ads must be clickable completely in all areas, must open in new tab/window, no pop ups allowed.
- Brand logo on the Ad must match with landing page and the content must be family safe.
- No Ads rotation between multiple sizes, lengths, skippable/non skippable, brands.
- Expandable Ads must be user-initiated (audio), click-to-expand or rollover-to-expand.
- Pure VPAID Ads are not supported. VPAID wrapped in VAST with flash/HTML5 media files are supported.
- Locally Shared Objects and 4th party calls are not permitted. Ads may not directly capture any personally-identifiable user information, no forms.
- No spyware, no malware, no viruses.
- VAST Ads must include a functional CORS header in all of its responses.
- ClickTag code requirement
- Click-through functions must use the 'getURL' command:
 - `on(release){ getURL(_root.clickTag,"_blank"); }`
